

# SecurEdge™ & SecurEdge™ Plus Lens Blocking Pads

- Unique reinforced foam resists torque forces in X-Y direction
- Soft foam surface conforms to lens curvature
- Modified acrylic adhesive system adheres to wide range of lens coatings

- **SecurEdge™ Plus Lens Blocking Pads** for super hydrophobic coatings.

**SecurEdge™** pad material has a unique construction which incorporates an internal reinforcement that aids in resisting rotational forces in X-Y direction to prevent slippage during the edging process. The conformable foam surface, with a modified acrylic adhesive system, insures good intimate contact to a wide range of lens materials, coatings and curvatures, yet removes cleanly. The **SecurEdge™ Plus** pad is designed specifically for low surface energy super hydrophobic coatings.
